## SIKYWORISS

## DATA SHEET

## SKY13449-001: 0.5 to 3.0 GHz SP3T High-Power Antenna Tuning Switch in a WLCSP Package

## Applications

- LTE TDD/FDD transmit/receive
- Antenna tuning
- GSM transmit
- Embedded modules

## Features

- Broadband frequency range: 0.5 to 3.0 GHz
- Low insertion loss: 0.7 dB @ 2.7 GHz
- SP3T for shunt antenna tuning applications
- No external DC blocking capacitors required
- Single GPIO control line with Vdd voltage regulator:
- Vctl $=1.35$ to 2.7 V
$-\mathrm{V} D \mathrm{D}=2.5$ to 4.8 V
- Small, 9-bump WLCSP, $262 \mu \mathrm{~m}$ diameter, $400 \mu \mathrm{~m}$ pitch ( $1.272 \times 1.272 \times 0.504 \mathrm{~mm}$ ) package (MSL1, $260{ }^{\circ} \mathrm{C}$ per JEDEC J-STD-020)

Skyworks Green ${ }^{\text {TM }}$ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to Skyworks Definition of Green ${ }^{T M}$, document number SQ04-0074.

Figure 2. SKY13449-001 Pinout (Top View, Bumps Facing Down)

Figure 1. SKY13449-001 Block Diagram

## Description

The SKY13449-001 is a single-pole, triple-throw (SP3T) designed for antenna tuning applications that require very low RoN and CofF. The SKY13449-001 can also be used for LTE/WCDMA/GSM transmit applications. Switching is controlled by an integrated GPIO interface with two control pins. Depending on the logic voltage level applied to the control pins, the antenna port is connected to one of the switched RF outputs (RF1, RF2, or RF3) through a low-insertion loss path, while the path between the antenna port and the other RF ports is in a high-isolation state.
No external DC blocking capacitors are required as long as no DC voltage is applied on any RF path.
The SKY13449-001 is provided in a compact 9-bump, $1.272 \times 1.272 \times 0.504$ mm Wafer Level Chip Scale Package (WLCSP) that meets requirements for board-level assembly. Bump diameters are 262 microns with a minimum bump pitch of 400 microns.
A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

[^0]Table 1. SKY13449-001 Signal Descriptions

| Pin | Name | Description | Pin | Name | Description |  |
| :--- | :--- | :--- | :---: | :--- | :--- | :---: |
| A1 | RF2 | RF I/0. Throw 2 of the switch. | B3 | RF3 | RF I/0. Throw 3 of the switch. |  |
| B1 | GND | Ground | A3 | RF1 | RF I/0. Throw 1 of the switch |  |
| C1 | VDD | Supply voltage | A2 | ANT | Antenna |  |
| C2 | V2 | Digital control input \#2 | B2 | GND | Ground |  |
| C3 | V1 | Digital control input \#1 |  |  |  |  |

## Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13449-001 are provided in Table 2. Electrical specifications are provided in Table 3.

The state of the SKY13449-001 is determined by the logic provided in Table 4.

Table 2. SKY13449-001 Absolute Maximum Ratings (Note 1)

| Parameter | Symbol | Minimum | Maximum | Units |
| :---: | :---: | :---: | :---: | :---: |
| Supply voltage | VdD | 2.5 | 5.0 | V |
| Digital control voltage | VCTL | -0.5 | +3.0 | V |
| GSM RF input power: <br> Low band <br> High band | PIN |  | $\begin{aligned} & +36 \\ & +34 \end{aligned}$ | $\begin{aligned} & \mathrm{dBm} \\ & \mathrm{dBm} \end{aligned}$ |
| Operating temperature | TOP | -30 | +90 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature | TSTG | -55 | +150 | ${ }^{\circ} \mathrm{C}$ |
| Electrostatic discharge: <br> Charged Device Model (CDM) <br> Human Body Model (HBM) <br> Machine Model (MM) | ESD |  | $\begin{gathered} 1000 \\ 1000 \\ 100 \\ \hline \end{gathered}$ | $\begin{aligned} & \text { V } \\ & \text { V } \\ & \text { V } \end{aligned}$ |

Note 1: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

Table 3. SKY13449-001 Electrical Specifications (1 of 2) (Note 1)

## Evaluation Board Description

The SKY13449-001 Evaluation Board is used to test the performance of the SKY13449-001 SP3T Switch. An Evaluation Board schematic diagram is shown in Figure 3. An assembly drawing for the Evaluation Board is shown in Figure 4. The PCB layout footprint is shown in Figure 5.

## Package Dimensions

Package dimensions for the SKY13449-001 die are shown in Figure 6, and tape and reel dimensions are provided in Figure 7.

## Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.
The SKY13449-001 is rated to Moisture Sensitivity Level 1 (MSL1) at $260^{\circ} \mathrm{C}$. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, Wafer Level Chip Scale Packages: SMT Process Guidelines and Handling Considerations, document number 201676.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Figure 4. SKY13449-001 Evaluation Board Assembly Diagram

Figure 5. SKY13449-001 PCB Layout Footprint (9-Bump WLCSP)

## Notes:

1. All dimensions are in millimeters unless otherwise specified.
2. Marking shown is for package orientation reference only.
3. Includes backside coating.
4. Ball height tolerance is $\pm 10 \%$ of nominal ball height.
